The Routledge History of the Domestic Sphere in Europe Joachim Eibach 2020-12-29 This book addresses the multifaceted history of the domestic sphere in Europe from the Age of Reformation to the emergence of modern society. By focusing on daily practice, interaction and social relations, it shows continuities and social change in European history from an interior perspective. The Routledge History of the Domestic Sphere in Europe contains a variety of approaches from different regions that each pose a challenge to commonplace views such as the emergence of confessional cultures, of private life, and of separate spheres of men and women. By analyzing a plethora of manifold sources including diaries, court records, paintings and domestic advice literature, this volume provides an overview of the domestic sphere as a location of work and consumption, conflict and cooperation, emotions and intimacy, and devotion and education. The book sheds light on changing relations between spouses, parents and children, masters and servants or apprentices, and humans and animals or plants, thereby exceeding the notion of the modern nuclear family. This volume will be of great use to upper-level graduates, postgraduates and experienced scholars interested in the history of family, household, social space, gender, emotions, material culture, work and private life in early modern and nineteenth-century Europe.

The Oxford Handbook of the History of Consumption Frank Trentmann 2012-03-22 The Oxford Handbook of the History of Consumption offers a timely overview of how our understanding of consumption in history has changed in the last generation.

Luxury in the Low Countries Rengienier C. Rittersma 2010 Painting a panoramic view of conspicuous consumption in the Netherlands and Flanders from 1500 to the present, this collection of essays explores the economic forces that produce a boom in luxury goods. Working from disciplines such as archaeology, art history, historical ethnology, linguistics, and media studies, these scholarly contributors explore both the wealth and the social display that fuels the search for rare commodities.

The Cambridge History of Ireland: Volume 2, 1550–1730 Jane Ohlmeyer 2018-03-31 This volume offers fresh perspectives on the political, military, religious, social, cultural, intellectual, economic, and environmental history of early modern Ireland and situates these discussions in global and comparative contexts. The opening chapters focus on 'Politics' and 'Religion and War' and offer a chronological narrative, informed by the re-interpretation of new archives. The remaining chapters are more thematic, with chapters on 'Society', 'Culture', and 'Economy and Environment', and often respond to wider methodologies and historiographical debates. Interdisciplinary cross-pollination - between, on the one hand, history and, on the other, disciplines like anthropology, archaeology, geography, computer science, literature and gender and environmental studies - informs many of the chapters. The volume offers a range of new departures by a generation of scholars who explain in a refreshing and accessible manner how and why people acted as they did in the transformative and tumultuous years between 1550 and 1730.

Sugar and Spice Jon Stobart 2016-12-01 Consumers in eighteenth-century England were firmly embedded in an expanding world of goods, one that incorporated a range of novel foods (tobacco, chocolate, coffee, and tea) and new supplies of more established commodities, including sugar, spices, and dried fruits. Much has been written about the attraction of these goods, which went from being novelties or expensive luxuries in the mid-seventeenth century to central elements of the British diet a century or so later. They have been linked to the rise of Britain as a commercial and imperial power, whilst their consumption is seen as transforming many aspects of British society and culture, from mealtimes to gender identity. Despite this huge significance to ideas of consumer change, we know remarkably little about the everyday processes through which groceries were sold, bought, and consumed. In tracing the lines of supply that carried groceries from merchants to consumers, *Sugar and Spice* reveals how changes in retailing and shopping were central to the broader transformation of consumption and consumer practices, but also questions established ideas about the motivations underpinning consumer choices. It demonstrates the dynamic nature of eighteenth-century retailing; the importance of advertisements in promoting sales and shaping consumer perceptions, and the role of groceries in making shopping an everyday activity. At the same time, it shows how both retailers and their customers were influenced by the practicalities and pleasures of consumption. They were active agents in consumer change, shaping their own practices rather than caught up in a single socially-inclusive cultural project such as politeness or respectability.

The Economic Future in Historical Perspective Paul A. David 2006-02-23 In this volume, leading modern economic historians show how analysis of past experiences contributes to a better understanding of present-day economic conditions; they offer important insights into major challenges that will occupy the attention of policy makers in the coming decades. The seventeen essays are organised around three major themes, the first of which is the changing constellation of forces sustaining long-run economic growth in market economies. The second major theme concerns the contemporary challenges posed by transitions in economic and political regimes, and by ideologies that represent legacies from past economic conditions that still affect policy responses to new 'crises'. The third theme is modern economic growth's diverse implications for human economic welfare - in terms of economic security, nutritional and health status, and old age support - and the institutional mechanisms communities have developed to cope with the risks that individuals are exposed to by the concomitants of rising prosperity.

The Industrial Revolution: A Very Short Introduction Robert C. Allen 2017-02-16 The 'Industrial Revolution' was a pivotal point in British history that occurred between the mid-eighteenth and mid-nineteenth centuries and led to far reaching transformations of society. With the advent of revolutionary manufacturing technology productivity boomed. Machines were used to spin and weave cloth, steam engines were used to provide reliable power, and industry was fed by the construction of the first railways, a great network of arteries feeding the factories. Cities grew as people shifted

from agriculture to industry and commerce. Hand in hand with the growth of cities came rising levels of pollution and disease. Many people lost their jobs to the new machinery, whilst working conditions in the factories were grim and pay was low. As the middle classes prospered, social unrest ran through the working classes, and the exploitation of workers led to the growth of trade unions and protest movements. In this Very Short Introduction, Robert C. Allen analyzes the key features of the Industrial Revolution in Britain, and the spread of industrialization to other countries. He considers the factors that combined to enable industrialization at this time, including Britain's position as a global commercial empire, and discusses the changes in technology and business organization, and their impact on different social classes and groups. Introducing the 'winners' and the 'losers' of the Industrial Revolution, he looks at how the changes were reflected in evolving government policies, and what contribution these made to the economic transformation. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Cities and Social Change in Early Modern France Philip Benedict 2005-06-28 The major changes experienced by France's cities over the period from the end of the middle ages to the eve of the Revolution are explored by six French and North American historians.

Luxury and Gender in European Towns, 1700-1914 Deborah Simonton 2014-09-04 This book conceives the role of the modern town as a crucial place for material and cultural circulations of luxury. It concentrates on a critical period of historical change, the long eighteenth and nineteenth centuries, that was marked by the passage from a society of scarcity to one of expenditure and accumulation, from ranks and orders to greater social mobility, from traditional aristocratic luxury to a new bourgeois and even democratic form of luxury. This volume recognizes the notion that luxury operated as a mechanism of social separation, but also that all classes aspired to engage in consumption at some level, thus extending the idea of what constituted luxury and blurring the boundaries of class and status, often in unsettling ways. It moves beyond the moral aspects of luxury and the luxury debates to analyze how the production, distribution, purchase or display of luxury goods could participate in the creation of autonomous selves and thus challenge gender roles.

Borderline Stan Goff 2015-02-11 What if the sanctification of war and contempt for women are both grounded in a fear that breeds hostility, and a hostility that rationalizes conquest? The anti-Gospel Christian history of war-loving and women-hating are not merely similar but two aspects of the same dynamic, argues Stan Goff, in an "autobiography" that spans millennia. *Borderline* is the historical and conceptual autobiography of a former career army veteran transformed by Jesus into a passionate advocate for nonviolence, written by a man who narrates his conversion to Christianity through feminism.

Consuming Splendor Linda Levy Peck 2005-09-19 A fascinating study of the ways in which consumption transformed social practices, gender roles, royal policies, and the economy in seventeenth-century England. It reveals for the first time the emergence of consumer society in seventeenth-century England.

Daily Lives and Daily Routines in the Long Eighteenth Century Gudrun Andersson 2021-08-13 This book explores the ways in which the lives and routines of a wide range of people across different parts of Europe and the wider world were structured and played out through everyday practices. It focuses on the detail of individual lives and how these were shaped by spaces and places, by movement and material culture – both the buildings they occupied and the objects they used in their everyday lives. Drawing on

original research by a range of established and emerging scholars, each chapter peers into the lives of people from various social groups as they went about their daily lives, from citizens on the streets to aristocrats at home in their country houses, and from the urban elite at leisure to seamen on board ships bound for the East Indies. For all these people, daily routines were important in structuring their lives, giving them a rhythm that was knowable and meaningful in its temporal regularity, be that daily, weekly, or seasonal. So too were their everyday encounters and relationships with other people, within and beyond the home; these shaped their practices, movements, and identities and thus served to mould society in a broader sense.

Comparative Responses to Globalization M. Umemura 2012-10-29 Explores how British and Japanese firms have responded to globalization from a long-term perspective. Incorporates studies from the 18th century and sheds light on the impact of the institutional setting, the influence of government and entrepreneurs, and the weight of historical contingency in conditioning firm responses to globalization.

Consumption and Gender in the Early Seventeenth-Century Household Jane Whittle 2012-03-01 Lady Alice Le Strange of Hunstanton in Norfolk kept a continuous series of household accounts from 1610-1654. Jane Whittle and Elizabeth Griffiths have used the Le Stranges' rich archive to reconstruct the material aspects of family life. This involves looking not only at purchases, but also at home production and gifts; and not only at the luxurious, but at the everyday consumption of food and medical care. Consumption is viewed not just as a set of objects owned, but as a process involving household management, acquisition and appropriation, a process that created and reinforced social links with craftsmen, servants, labourers, and the local community. It is argued that the county gentry provide a missing link in histories of consumption: connecting the fashions of London and the royal court, with those of middling strata of rural England. Recent writing has focused upon the transformation of consumption patterns in the eighteenth century. Here the earlier context is illuminated and, instead of tradition and stability, we find constant change and innovation. Issues of gender permeate the study. Consumption is often viewed as a female activity and the book looks in detail at who managed the provisioning, purchases, and work within the household, how spending on sons and daughters differed, and whether men and women attached different cultural values to household goods. This single household's economy provides a window into some of most significant cultural and economic issues of early modern England: innovations in trade, retail and production, the basis of gentry power, social relations in the countryside, and the gendering of family life.

Public Universities and the Public Sphere Woodruff D. Smith 2010-11-15 *Public Universities and the Public Sphere* argues that two crises facing America – a crisis of public discourse and a crisis of public higher education – are closely connected. The center of significant public discussion in the United States is located in a core public sphere consisting of publications, associations, and universities that was consciously constructed in the nineteenth century. The modern American university originated in the process that created the core public sphere. Public universities essentially democratized the core public sphere in the twentieth century. Part of the solution, Smith argues in this timely work, to both crises lies in understanding and building on the connection.

The Life Cycle of Russian Things Matthew P. Romaniello 2021-09-09 *The Life Cycle of Russian Things* re-orientates commodity studies using interdisciplinary and comparative methods to foreground unique Russian and Soviet materials as varied as apothecary wares, isinglass, limestone and tanks. It also transforms modernist and Western interpretations of the material by emphasizing the commonalities of the Russian experience. Expert contributors from across the United States, Canada, Britain, and Germany come together to situate Russian material culture studies at an interdisciplinary crossroads. Drawing upon theory from anthropology, history, and literary and museum studies, the volume presents a complex narrative, not only in terms of material consumption but also in terms of production and the secondary life of inheritance, preservation, or even destruction. In doing so, the book reconceptualises material culture as a lived experience of sensory interaction.

The Life Cycle of Russian Things sheds new light on economic history and consumption studies by reflecting the diversity of Russia's experiences over the last 400 years.

This House is not a Home Lisa Hellman 2018-10-25 In *This House is not a Home*, Lisa Hellman offers the first study of European everyday life in Canton and Macao. Using the Swedish East India Company as a focus, she explores how domesticity was conditioned by the Chinese authorities.

Early Modern European Society Henry Kamen 2021-08-31 A new edition of a seminal work—one that explores crucial changes within Europe from the fifteenth to the eighteenth century. The early modern period was one of profound change in Europe. It was witness to the development of science, religious reformation, and the birth of the nation state. As Europeans explored the world—looking to Asia and the Americas for new peoples and lands—their societies grew and adapted. Eminent historian Henry Kamen explores in depth the issues that most affected those living in early modern Europe—from leisure, work, and migration to religion, gender, and discipline—and the way in which population change impacted the aristocracy, the bourgeoisie, and the poor. The third edition of this pioneering study includes new and updated material on gender, religion, and population movement. Richly illustrated, this is essential reading for all those interested in early modern European society.

British Clubs and Societies 1580-1800 Peter Clark 2000-01-06 Modern freemasonry was invented in London about 1717, but was only one of a surge of British associations in the early modern era which had originated before the English Revolution. By 1800, thousands of clubs and societies had swept the country. Recruiting widely from the urban affluent classes, mainly amongst men, they traditionally involved heavy drinking, feasting, singing, and gambling. They ranged from political, religious and scientific societies, artistic and literary clubs, to sporting societies, bee keeping, and birdfancying clubs, and a myriad of other associations.

Communism Unwrapped Paulina Bren 2012-08-08 *Communism Unwrapped* reveals the complex world of consumption in Cold War Eastern Europe, exploring the ways people shopped, ate, drank, smoked, cooked, acquired, assessed and exchanged goods. These everyday experiences, the editors and contributors argue, were central to the way that communism was lived in its widely varied contexts in the region. From design, to production, to retail sales and black market exchange, *Communism Unwrapped* follows communist goods from producer to consumer, tracing their circuitous routes. In the communist world this journey was rife with its own meanings, shaped by the special political and social circumstances of these societies. In examining consumption behind the Iron Curtain, this volume brings dimension and nuance to understandings of the communist period and the history of consumerism.

Locating the Global Holger Weiss 2020-08-10 This volume adds to the plurality of global histories by locating the global through its articulation and manifestation within particular localities. It accomplishes this by bringing together interlinked case-studies that analyse various temporal and spatial dimensions of the global in the local and the interactions between the local and the global. The case-studies apply a spatial approach to analyse how global questions of space, movement, networks, borders, and territory are worked out at a local level. The material draws on the Nordic countries, Europe, the Atlantic world, Africa, and Australia and ranges from the seventeenth to the twentieth century. It is further divided into sections that address topics such as the translocality of humans and goods, local articulations of identities and globalities, parliamentarism and anti-colonialism, the organization of knowledge and the construction of spaces of representation and memory.

Consumption and the Making of Respectability, 1600-1800 Woodruff D. Smith 2002 Tying together of several distinct cultural patterns during this century to create a culture of respectability and its impact on popular culture, trade, politics, social dynamics, and literature, this original and thoughtful work provides a comprehensive and much-needed understanding of the origins of modern consumption and all of its cultural implications.

The Social Life of Coffee Brian Cowan 2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did

an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

Rethinking the Age of Revolutions David A. Bell 2018-09-04 Much of the historiography on the age of democratic revolutions has seemed to come to a halt until recent years. Historians of this period have tried to develop new explanatory paradigms but there are few that have had a lasting impact. David A. Bell and Yair Mintzker seek to break through the narrow views of this period with research that reaches beyond the traditional geographical and chronological boundaries of the subject. *Rethinking the Age of Revolutions* brings together some of the most exciting and important research now being done on the French Revolutionary era, by prominent historians from North America and France. Adopting a variety of approaches, and tackling a wide variety of subjects, such as natural rights in the early modern world, the birth of celebrity culture and the phenomenon of modern political charisma, among others, this collection shows the continuing vitality and importance of the field. This is an important book not only for specialists, but for anyone interested in the origins of some of the most important issues in the politics and culture of the modern West.

A Social History of Germany, 1648-1914 Eda Sagarra 2017-07-12 This volume is a pioneering effort to examine the social, demographic, and economic changes that befell the Jewish communities of Central Europe after the dissolution of the Habsburg Empire. It consists of studies researched and written especially for this volume by historians, sociologists, and economists, all specialists in modern Central European Jewish affairs. The era of national rivalry, economic crises, and political confusion between the two World Wars has been preceded by a pre-World War I epoch of Jewish emancipation and assimilation. During that period, Jewish minorities had been harbored from violent anti-Semitism by the Empire, and they became torchbearers of industrialization and modernization. This common destiny encouraged certain common characteristics in the three major components of the Empire, Austria, Hungary, and the Czech territories, despite the very different origins of the well over one million Jews in those three lands. The disintegration of the Habsburg Empire created three small, economically marginal national states, inimical to each other and at liberty to create their own policies toward Jews in accord with the preferences of their respective ruling classes. Active and openly discriminatory anti-Semitic measures resulted in Austria and Hungary. The only liberal heir country of the Empire was Czechoslovakia, although simmering anti-Semitism and below surface discrimination were widespread in Slovakia. While one might have expected Jewish communities to return to their pre-World War I tendencies to go their independent ways after the introduction of these policies, social and economic patterns which had evolved in the Habsburg era persisted until the Anschluss in Austria, German occupation in Czechoslovakia, and World War II in Hungary. Studies in this volume attest to continuing similarities among the three Jewish communities, testifying to the depth of the Empire's long lasting impact on the behavior of Jews in Central Euro

A Taste for Luxury in Early Modern Europe Johanna Ilmakunnas 2017-06-29 Jon Stobart and Johanna Ilmakunnas bring together a range of scholars from across mainland Europe and the UK to examine luxury and taste in early modern Europe. In the 18th century, debates raged about the economic, social and moral impacts of luxury, whilst taste was viewed as a refining influence and a marker of rank and status. This book takes a fresh, comparative approach to these ideas, drawing together new scholarship to examine three related

areas in a wide variety of European contexts. Firstly, the deployment of luxury goods in displays of status and how these practices varied across space and time. Secondly, the processes of communicating and acquiring taste and luxury: how did people obtain tasteful and luxurious goods, and how did they recognise them as such? Thirdly, the ways in which ideas of taste and luxury crossed national, political and economic boundaries: what happened to established ideas of luxury and taste as goods moved from one country to another, and during times of political transformation? Through the analysis of case studies looking at consumption practices, material culture, political economy and retail marketing, *A Taste for Luxury in Early Modern Europe* challenges established readings of luxury and taste. This is a crucial volume for any historian seeking a more nuanced understanding of material culture, consumption and luxury in early modern Europe.

Investing in Cultural Diversity and Intercultural Dialogue Unesco 2009 This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Selling Beauty Morag Martin 2009-10-05 The practices of beauty -- A market for beauty -- Advertising beauty -- Maligning beauty -- Domesticating beauty -- Selling natural artifice -- Selling the orient -- Selling masculinity.

The Ideological Origins of Nazi Imperialism Woodruff D. Smith 1989 The author argues that the imperialist ideology and policies adopted by the Nazis must be seen as the result of a complex evolution of imperialist thinking in Germany which had its roots in the nineteenth century.

Production and Consumption in English Households 1600–1750 Darron Dean 2004-08-02 This economic, social and cultural analysis of the nature and variety of production and consumption activities in households in Kent and Cornwall yields important new insights on the transition to capitalism in England.

Spaces of Consumption Jon Stobart 2013-01-11 Consumption is well established as a key theme in the study of the eighteenth century. *Spaces of Consumption* brings a new dimension to this subject by looking at it spatially. Taking English towns as its scene, this inspiring study focuses on moments of consumption – selecting and purchasing goods, attending plays, promenading – and explores the ways in which these were related together through the spaces of the town: the shop, the theatre and the street. Using this fresh form of analysis, it has much to say about sociability, politeness and respectability in the eighteenth century.

Addictive Consumption Gerda Reith 2018-08-29 In this engaging new book, Gerda Reith explores key theoretical concepts in the sociology of consumption. Drawing on the ideas of Foucault, Marx and Bataille, amongst others, she investigates the ways that understandings of ‘the problems of consumption’ change over time, and asks what these changes can tell us about their wider social and political contexts. Through this, she uses ideas about both consumption and addiction to explore issues around identity and desire, excess and control and reason and disorder. She also assesses how our concept of ‘normal’ consumption has grown out of efforts to regulate behaviour historically considered as disruptive or deviant, and how in the contemporary world the ‘dark side’ of consumption has been medicalised in terms of addiction, pathology and irrationality. By drawing on case studies of drugs, food and gambling, the volume demonstrates the ways in which modern

practices of consumption are rooted in historical processes and embedded in geopolitical structures of power. It not only asks how modern consumer culture came to be in the form it is today, but also questions what its various manifestations can tell us about wider issues in capitalist modernity. *Addictive Consumption* offers a compelling new perspective on the origins, development and problems of consumption in modern society. The volume’s interdisciplinary profile will appeal to scholars and students in sociology, psychology, history, philosophy and anthropology.

Contested Spaces of Nobility in Early Modern Europe Charles Lipp 2016-05-13 In recent years scholars have increasingly challenged and reassessed the once established concept of the ‘crisis of the nobility’ in early-modern Europe. Offering a range of case studies from countries across Europe this collection further expands our understanding of just how the nobility adapted to the rapidly changing social, political, religious and cultural circumstances around them. By allowing readers to compare and contrast a variety of case studies across a range of national and disciplinary boundaries, a fuller - if more complex - picture emerges of the strategies and actions employed by nobles to retain their influence and wealth. The nobility exploited Renaissance science and education, disruptions caused by war and religious strife, changing political ideas and concepts, the growth of a market economy, and the evolution of centralized states in order to maintain their lineage, reputation, and position. Through an examination of the differing strategies utilized to protect their status, this collection reveals much about the fundamental role of the ‘second order’ in European history and how they had to redefine the social and cultural ‘spaces’ in which they found themselves. By using a transnational and comparative approach to the study of the European nobility, the volume offers exciting new perspectives on this important, if often misunderstood, social group.

Luxury and Pleasure in Eighteenth-Century Britain Maxine Berg 2005-06-30 *Luxury and Pleasure in Eighteenth-Century Britain* explores the invention, making, and buying of new, semi-luxury, and fashionable consumer goods during the eighteenth century. It follows these goods, from china tea ware to all sorts of metal ornaments such as candlesticks, cutlery, buckles, and buttons, as they were made and shopped for, then displayed in the private domestic settings of Britain’s urban middling classes. It tells the stories and analyses the developments that led from a global trade in Eastern luxuries beginning in the sixteenth century to the new global trade in British-made consumer goods by the end of the eighteenth century. These new products, regarded as luxuries by the rapidly growing urban and middling-class people of the eighteenth century, played an important part in helping to proclaim personal identities, and guide social interaction. Customers enjoyed shopping for them; they took pleasure in their beauty, ingenuity or convenience. All manner of new products appeared in shop windows; sophisticated mixed-media advertising seduced customers and created new wants. This unparalleled ‘product revolution’ provoked philosophers and pundits to proclaim a ‘new luxury’, one that reached out to the middling and trading classes, unlike the elite and corrupt luxury of old. *Luxury and Pleasure in Eighteenth-Century Britain* is cultural history at its best, built on a fresh empirical base drawn directly from customs accounts, advertising material, company papers, and contemporary correspondence. Maxine Berg traces how this new consumer society of the eighteenth century and the products first traded, then invented to satisfy it, stimulated industrialization itself. Global markets for the consumer goods of private and domestic life inspired the industrial revolution and British products ‘won the world’.

Consuming Habits Jordan Goodman 2014-04-08 Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. *Consuming Habits* is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as ‘legal’ or ‘illegal’ has diverted attention away from understanding their important cultural and historical role. This collection explores the rich

analytical category of psychoactive substances from challenging historical and anthropological perspectives.

The Single Homemaker and Material Culture in the Long Eighteenth

Century David Hussey 2016-03-03 The Single Homemaker and Material Culture in the Long Eighteenth Century represents a new synthesis of gender history and material culture studies. It seeks to analyse the lives and cultural expression of single men and women from 1650 to 1850 within the main focus of domestic activity, the home. Whilst there is much scholarly interest in singleness and a raft of literature on the construction and apprehension of the home, no other book has sought to bring these discrete studies together. Similarly, scholarly work has been limited in evaluating gendered consumption practices during the long eighteenth century because of an emphasis on the homes of families. Analysing the practices of single people emphasises the differences, but also amplifies the similarities, in their strategies of domestic life.

A History of American Consumption Terrence H. Witkowski 2017-09-14 The United States has been near the forefront of global consumption trends since the 1700s, and for the past century and more, Americans have been the world's foremost consuming people. Informed and inspired by the literature from consumer culture theory, as well as drawing from numerous studies in social and cultural history, *A History of American Consumption* tells the story of the American consumer experience from the colonial era to the present, in three cultural threads. These threads recount the assignment of meaning to possessions and consumption, the gendered ideology and allocation of consumption roles, and resistance through anti-consumption thought and action. Brief but scholarly, this book provides a thought provoking, introduction to the topic of American consumption history informed by research in consumer culture theory. By examining and explaining the core phenomenon of product consumption and its meaning in the changing lives of Americans over time, it provides a valuable contribution to the literature on the subjects of consumption and its causes and consequences. Readable and insightful, it will be of interest to scholars and advanced students in consumer behaviour, advertising, and marketing and business history.

Consuming Behaviours Erika Rappaport 2020-05-26 In twentieth-century

Britain, consumerism increasingly defined and redefined individual and social identities. New types of consumers emerged: the idealized working-class consumer, the African consumer and the teenager challenged the prominent position of the middle and upper-class female shopper. Linking politics and pleasure, *Consuming Behaviours* explores how individual consumers and groups reacted to changes in marketing, government control, popular leisure and the availability of consumer goods. From football to male fashion, tea to savings banks, leading scholars consider a wide range of products, ideas and services and how these were marketed to the British public through periods of imperial decline, economic instability, war, austerity and prosperity. The development of mass consumer society in Britain is examined in relation to the growing cultural hegemony and economic power of the United States, offering comparisons between British consumption patterns and those of other nations. Bridging the divide between historical and cultural studies approaches, *Consuming Behaviours* discusses what makes British consumer culture distinctive, while acknowledging how these consumer identities are inextricably a product of both Britain's domestic history and its relationship with its Empire, with Europe and with the United States.

Consumer Behaviour and Material Culture in Britain, 1660-1760 Lorna Weatherill 2002-09-11 This is a detailed study of the material lives of the middle classes in the pre-industrial era, a period which saw considerable growth in consumption. Lorna Weatherill has brought her highly important survey up-to-date in the light of new research. She provides a new introduction and bibliography, taking account of the latest academic writing and methodological advances, including computing, and offers further conclusions about her work and its place in current literature. Three main types of documentation are used to construct the overall picture: diaries, household accounts, and probate inventories. In investigating these sources she interprets the social meaning of material goods; and then goes on to relate this evidence to the social structures of Britain by wealth, status and locality. Breaking new ground in focusing on households and the use of probate inventories, Weatherill has provided a book which gives both a general account of the domestic environment of the period, and a scholarly analysis of the data on consumption patterns.
