*Left for Dead* Pete Nelson 2002-05-14 For fans of sea battles, adventures, and war stories like *Unbroken*, this is the incredible true story of a boy who helps to bring closure to the survivors of the tragic sinking of the USS Indianapolis, and helps exonerate the ship's captain fifty years later. Hunter Scott first learned about the sinking of the USS Indianapolis by watching the movie *Jaws* when he was just eleven-years-old. This was fifty years after the ship had sunk, throwing more than 1,000 men into shark-infested waters—a long fifty years in which justice still had not been served. It was just after midnight on July 30, 1945 when the USS Indianapolis was torpedoed by a Japanese submarine. Those who survived the fiery sinking—some injured, many without life jackets—struggled to stay afloat as they waited for rescue. But the United States Navy did not even know they were missing. As time went on, the

Navy needed a scapegoat for this disaster. So it court-martialed the captain for “hazarding” his ship. The survivors of the Indianapolis knew that their captain was not to blame. For fifty years they worked to clear his name, even after his untimely death. But the navy would not budge—not until Hunter entered the picture. His history fair project on the Indianapolis soon became a crusade to restore the captain's good name and the honor of the men who served under him. be inspired by the youth's tenacity—and by the valor of those who served on the Indianapolis.”—The Horn Book

*Learning to Rank for Information Retrieval and Natural Language Processing, Second Edition*

Hang Li 2022-05-31 Learning to rank refers to machine learning techniques for training a model in a ranking task. Learning to rank is useful for many applications in information retrieval, natural language processing, and data mining. Intensive studies have been conducted on its problems recently, and significant progress has been made. This lecture gives an introduction to the area including the fundamental problems, major approaches, theories, applications, and future work. The author begins by showing that various ranking problems in information retrieval and natural language processing can be formalized as two basic ranking tasks, namely ranking creation (or simply ranking) and ranking aggregation. In ranking creation, given a request, one wants to generate a ranking list of offerings based on the features derived from the request and the offerings. In ranking aggregation, given a request, as well as a number of ranking lists of offerings, one wants to generate a new ranking list of the offerings. Ranking creation (or ranking) is the major problem in learning to rank. It is usually formalized as a supervised learning task. The author gives detailed explanations on learning for ranking creation and ranking aggregation,

including training and testing, evaluation, feature creation, and major approaches. Many methods have been proposed for ranking creation. The methods can be categorized as the pointwise, pairwise, and listwise approaches according to the loss functions they employ. They can also be categorized according to the techniques they employ, such as the SVM based, Boosting based, and Neural Network based approaches. The author also introduces some popular learning to rank methods in details. These include: PRank, OC SVM, McRank, Ranking SVM, IR SVM, GBRank, RankNet, ListNet & ListMLE, AdaRank, SVM MAP, SoftRank, LambdaRank, LambdaMART, Borda Count, Markov Chain, and CRanking. The author explains several example applications of learning to rank including web search, collaborative filtering, definition search, keyphrase extraction, query dependent summarization, and re-ranking in machine translation. A formulation of learning for ranking creation is given in the statistical learning framework. Ongoing and future research directions for learning to rank are also discussed.

Why Humans Like Junk Food Steven Witherly  
2007-06 Our major drive to eat centers around pleasure. But without understanding the nature of food pleasure and perception, we can't make useful modifications to food. Why Humans Like Junk Food: Edible Pleasure Explained explores, for the first time, the physiological basis for "food pleasure" and why these cravings occur. Author Steven Witherly chronicles how chefs and food scientists make our favorite foods taste irresistible. He also simplifies and outlines the various food-related pleasure principles through the use of general observations, aphorisms, and theories. Witherly shares the reasons why we like everything from gourmet coffee to Southern fried chicken, culinary secrets of the top chefs, and the eight biggest cooking mistakes amateurs make. Without even opening a cookbook, Witherly can show you how to use ingredients that will add the most pleasure to your culinary experience. For the everyday cook, dietician, food scientist, or professional chef, this revolutionary guide can help you improve your cooking by explaining the physiological power of great-tasting food!

### *Leadership Coaching* Tony Stoltzfus 2005-06-28

Leadership Coaching is an essential tool for anyone who wants to learn to coach or improve their coaching skills. Written by a top Christian coach trainer, it is filled with real-life stories, practical tools and application exercises that bring coaching techniques to life. Part I is an in-depth look at how coaching fits with the purposes of God. Starting with key biblical concepts about how God builds leaders, this book goes beyond proof-texting to present an integrated, values-based paradigm for leadership coaching. Part II uses a hands-on, interactive approach to show you how to coach. Utilizing the seven key elements of effective coaching as a framework, each facet of the coaching relationship is explained in detail. Then follow-up Master Class sections help you internalize the key concepts and try them out in real life. Leadership coaching is a great introduction to a powerful way of helping others grow.

Law: A Very Short Introduction Raymond Wacks 2008-03-27 Law underlies our society - it protects our rights, imposes duties on each of us, and

establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote freedom, and protect our security. The result is a system that, while it touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly

readable.

A Historical Guide to Edith Wharton Carol J. Singley 2003-01-30 Edith Wharton, arguably the most important American female novelist, stands at a particular historical crossroads between sentimental lady writer and modern professional author. Her ability to cope with this collision of Victorian and modern sensibilities makes her work especially interesting. Wharton also writes of American subjects at a time of great social and economic change-Darwinism, urbanization, capitalism, feminism, world war, and eugenics.

She not only chronicles these changes in memorable detail, she sets them in perspective through her prodigious knowledge of history, philosophy, and religion. A Historical Guide to Edith Wharton provides scholarly and general readers with historical contexts that illuminate Wharton's life and writing in new, exciting ways. Essays in the volume expand our sense of Wharton as a novelist of manners and demonstrate her engagement with issues of her day.

**Nothing Is Impossible** Dynamo 2012-09-27 'I immersed myself in magic. I read every book I could get my hands on and practised and practised, day after day and night after night. Magic became my world...some might say an

obsession.' When you're a kid life can seem tough; tougher for some than others. But the darkest of times can also be the most enlightening. When his late granddad showed him magic for the first time, Steven Frayne knew there was more to life than hiding from bullies. He had a destiny. A calling. In that moment Dynamo was born: the most exciting magician of the 21st century. Since then, Dynamo has shocked, thrilled and amazed men, women and children, from all walks of life, all over the world. With his mind-blowing illusions, he has catalysed a whole new era of magic. Now, in his very first book, Dynamo invites you to join him on a breathtaking journey across the globe. Be prepared to levitate Lindsay Lohan in Singapore, transform snow into diamonds in the Austrian mountains, and walk on water across the River Thames. Along the way, he reveals how to make the impossible possible, what it takes to pull off the greatest stunts man has seen, and why everyone needs magic in their lives. This is no illusion. This is Dynamo revealed.

**Kurt Cobain** Christopher Sandford 1995 Here is the first biography to explore, with shocking detail, the drama that formed this troubled, tragic rock star. Neither an apology nor a condemnation, Kurt Cobain presents a vivid insider's view of the life and death of a man who galvanized a generation and gave birth to the "grunge" revolution with his band Nirvana. Sandford portrays the provocative, small-town rebel with the talent of John Lennon,

and then shows him at work on concert stages in Seattle, New York, and London. Readers follow the struggles of Cobain's emotional life-his tumultuous relationships with family and his fellow band members, his drug addiction and sexual appetite, his stormy marriage to Courtney Love, and the birth of his daughter, who, as Cobain wrote in his suicide note, "reminds me too much of who I used to be." During his research, Sandford has had access to Cobain's family, his colleagues, his former friends and lovers, and even author William S. Burroughs, whom Cobain considered to be his "greatest influence." The result is a graphic account of the life that led to the day in April 1994 when Cobain turned a shotgun on himself and became a martyr to disaffected youth around the world.
