Everything I love best: humor, warmth, emotions that pull at the heartstrings, characters that step off the page, and a wonderful love story." --Mariah Stewart, New York Times bestselling author HOW SWEET IT IS Single mom Lizzie Bea Carpenter learned long ago that no white knight was coming to save her. A hardworking waitress at the local diner, she's raising her daughter to be like the independent women in her "Enemy Club"--high school rivals turned best friends, promising to always tell each other the whole truth and nothing but! Yet part of Lizzie wishes she did have a man's help, just for small stuff, like fixing up the house. Her fairy godmother must have been listening, because Dante "Tay" Giovanni soon appears. He's sexy, kind, and offering assistance--no strings attached. Slowly, steadily, Lizzie's heart opens. But the grip of the past is fierce, and nothing in life is ever really free. Tay has his own tragedies to overcome, but if he can, he'll fix more than

Lizzie's home. He'll show her just how sweet it is to be loved by him.

Who's Who in Research: Cultural Studies Intellect Books 2013-01-01

Increasingly, academic communities transcend national boundaries.

'Collaboration between researchers across space is clearly increasing, as well as being increasingly sought after,' noted the online magazine Inside Higher Ed in a recent article about research in the social sciences and humanities. Even for those scholars who don't work directly with international colleagues, staying up-to-date and relevant requires keeping up with international currents of thought in one's field. But when one's colleagues span the globe, it's not always easy to keep track of who's who – or what kind of research they're conducting. That's where Intellect's new series comes in. A set of worldwide guides to leading academics – and their work – across the arts and humanities, *Who's Who in Research* features comprehensive profiles of scholars in the areas of cultural studies, film studies, media studies, performing arts and visual arts. *Who's Who in Research: Visual Arts* includes concise yet detailed listings include each academic's name, institution, biography, and current research interests, as well as bibliographic information and a list of articles published in Intellect journals. The volumes in the *Who's Who in Research* series will be updated each year, providing the most current information on the foremost thinkers in academia and making them an invaluable resource for scholars, hiring committees, academic libraries and would-be collaborators across the arts and humanities.

Luminescence J. L. Weil 2014-01-07 My dreams were anything but normal.

My temper sucked. And the new guy at school was anything but average. I was a goner. We are talking, picking my drooling tongue off the floor kind of gone. One reckless decision to skip school and I found myself in the arms of a bad boy with an attitude, disarming smirks, and uber mystery shrouding him. Gavin Mason was mouthwatering hot, and his stormy sapphire eyes were filled with secrets. Gavin might be dark and dreamy, but he wasn't the guy who captivated my nights. Lukas Devine looked like the boy next door, and it was his sunny face that heated up my unusual dreams. The closer I get to Gavin, the crazier they become. Then the unexpected happens. Gavin literally froze an object mid-air saving my ass from what could have been a life-threatening situation. Turned out the guy I am crushing hardcore on, was a witch. Yep. You got it. A full-blooded witch. Magic just wasn't a myth, and Gavin and his family weren't the only witches in town. But will I be able to accept my fate, a fate that might be unavoidable.

Human Rights and World Trade Ana Gonzalez-Pelaez 2004-08-02 A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move

the hunger agenda forward in order to break through its current stagnation.

All Miranda wants is justice--whatever it costs. A Physical Introduction to Fluid Mechanics Alexander J. Smits 2000 Uncover Effective Engineering Solutions to Practical Problems With its clear explanation of fundamental principles and emphasis on real world applications, this practical text will motivate readers to learn. The author connects theory and analysis to practical examples drawn from engineering practice. Readers get a better understanding of how they can apply these concepts to develop engineering answers to various problems. By using simple examples that illustrate basic principles and more complex examples representative of engineering applications throughout the text, the author also shows readers how fluid mechanics is relevant to the engineering field. These examples will help them develop problem-solving skills, gain physical insight into the material, learn how and when to use approximations and make assumptions, and understand when these approximations might break down. Key Features of the Text * The underlying physical concepts are highlighted rather than focusing on the mathematical equations. * Dimensional reasoning is emphasized as well as the interpretation of the results. * An introduction to engineering in the environment is included to spark reader interest. * Historical references throughout the chapters provide readers with the rich history of fluid mechanics.

DeFi and the Future of Finance Campbell R. Harvey 2021-08-24 During the Global Financial Crisis in 2008, our financial infrastructure failed. Governments bailed out the very institutions that let the economy down. This episode spurred a serious rethink of our financial system. Does it make any sense that it takes two days to settle a stock transaction? Why do retailers, operating on razor thin margins, have to pay 3% for every customer credit card swipe? Why does it take two days to transfer money from a bank account to a brokerage—or any other company? Why are savings rates miniscule or negative? Why is it so difficult for entrepreneurs to get financing at traditional banks? In DeFi and the Future of Finance, Campbell R. Harvey, Ashwin Ramachandran and Joey Santoro, introduce the new world of Decentralized Finance. The book argues that the current financial landscape is ripe for disruption and we are seeing, in real time, the reinvention of finance. The authors provide the reader with a clear assessment of the problems with the current financial system and how DeFi solves many of these problems. The essence of DeFi is that we interact with peers—there is no brick and mortar and all of the associated costs. Savings and lending are reinvented. Trading takes place with algorithms far removed from traditional brokerages. The book conducts a deep dive on some of the most innovative protocols such as Uniswap and Compound. Many of the companies featured in the book you might not have heard of—however, you will in the future. As

with any new technology, there are a myriad of risks and the authors carefully catalogue these risks and assess which ones can be successfully mitigated. Ideally suited for people working in any part of the finance industry as well as financial policy makers, DeFi and the Future of Finance gives readers a vision of the future. The world of finance will fundamentally be changed over the coming decade. The book enables you to become part of the disruption – not the target of the disruption.
