**The Maliniak Method** Leon Maliniak 2011-08-01 Announcing A Major Break-Through In The Science Of Hair Loss And Male Pattern Baldness A radical new theory has recently been published which explains that HAIR LOSS and MALE PATTERN BALDNESS are really caused by TWO factors and not just one, as was previously thought. Stop Hair Loss and Grow New Hair with the Maliniak Method The first factor, which is the radical new element, is the third layer of the TOP of the scalp called the GALEA which becomes very "tight" in some people, disrupts ordinary blood flow to the follicles and sets in motion the sequence of events which triggers hair loss. The role of the GALEA has been debated for years, but this new theory provides the rationale for concluding that it must be involved because men only go bald in the areas where this GALEA exists and nowhere else. The second factor is still dihydrotestosterone (DHT) which this new theory now states only accumulates due to this restricted blood flow and which is still the actual "killer" of follicles, as per the conventional wisdom. Even more significantly, this theory also concludes that "dormant" follicles can in fact be revived to produce hair again contrary to everything we were previously told. The new theory is called the MALINIAK METHOD and is published by BORN AGAIN, The Alternate Science Company. More importantly, this theory also provides a simple new two-step treatment method which first relaxes the GALEA with simple massage techniques to restore proper blood flow to the top of the scalp. It then stimulates the dormant follicles to produce hair again with an electrical stimulation device which revives the use of an old established science derived from NIKOLA TESLA. It has been around for one hundred years and is still being used to this day but in other applications. It has been adopted and adapted in the MALINIAK METHOD to treat HAIR LOSS because that is one of the purposes it was used for originally. Two independent scientific studies have recently been published which confirm the validity of the TWO main premises of the MALINIAK METHOD. One of them is from the CROWN institute in Pickering, Ontario, which confirms that the GALEA is in fact involved in hair loss and male pattern baldness. It also concludes that a reduction in the oxygen going to the follicles causes DHT to be overproduced, adding another explanation for why this "tightness" of the scalp is at the root of this problem. The second study is from the University of Pennsylvania which found that certain types of STEM CELLS called "progenitor" cells are more numerous in non-bald areas and that these dormant cells can in fact be induced to become "progenitor" cells, in effect, be "revived" and induced to produce hair again, contrary to the previous knowledge and as predicted by the MALINIAK METHOD.

If you are doing it right, you should see results after the first week. You do need, however, to be reasonable, and make this a long-term commitment. Depending on how advanced your balding is, the recovery time may vary from individual to individual. And, I want to be honest with you - if you are completely or almost entirely bald, you will most probably need a higher amount of time for your hair to recover. But let's face it - the hair didn't go away all at once, am I right? I will recommend this treatment also to guys that didn't see any signs of going bald, but they are having relatives who are facing baldness. Prevention will keep you away from the struggle that going bald implies. My honest hope is that you get huge value from it. - Mark
